

## **TFS Trial Form Support International is moving to new headquarters**

TFS Trial Form Support International is moving its headquarters from Helsingborg, Sweden, to the southern university city of Lund, Sweden. The move from the previous headquarters in Helsingborg to Lund was completed on the 2<sup>nd</sup> of May. The new headquarters in Lund will include both corporate functions and operational departments and will host in total 75 employees.

"This move has been discussed in the Board of Directors for some years, however not executed until now" says Chief Executive Officer, Mr. Daniel Spasic.

"It was a strategic move which will place us in the heart of Medicon Valley, one of the leading Biotech clusters in Europe and close to some of our largest clients in the south of Sweden and on the Danish side. Furthermore close access to the University of Lund and the University Hospital were other factors contributing to the final decision. Both institutions are important complements to our business in terms of securing competent people to our operations and conducting clinical trials at the university Hospital - mainly in oncology", continues Mr. Spasic.

Lund is located in the south of Sweden, which is in the area well known as "Medicon Valley". Medicon Valley is the centre for all life science activities in the greater Copenhagen area in Denmark and southern Sweden. The region is furthermore one of the strongest pharmaceutical and biotechnological clusters in Europe and comprises a large number of universities, hospitals and more than 300 life science companies, of which more than 200 are R&D based. Lund is located less than 40 minutes by car from one of the largest international airports in Europe, Copenhagen Airport, Kastrup, in Denmark. The region is also well connected to Denmark with the "Öresundbron", a bridge joining the two countries.

"We have definitely strengthened our international competitiveness by placing our headquarters in this very dynamic region", Mr. Spasic concludes.
