TFS Trial Form Support enters vaccine agreement

TFS Trial Form Support (TFS) has as of September 2006, been awarded its third large vaccine study in infants. The agreement was entered between TFS and one of the leading vaccine development companies in the world.

The study will be conducted in Finland involving 9 clinical sites and 250 infants to be included during 3 months of recruitment period. The study is now in the regulatory process and will expect the first patient by January 2007. Finland has proven to be a very suitable country for large vaccine trials and has been included in the program from the very start.

"We are very pleased to see that this collaboration can move on from study to study and obviously we have been able to deliver on targets in all aspects" says Mr. Daniel Spasic, Chief Executive Officer of the TFS Group.

TFS has recently stopped the recruitment in the previous vaccine study that involved 12 clinical sites in Finland and Sweden and 850 infants. The recruitment of 850 infants was achieved after 4 months.

"We do have an experienced vaccine team handling these studies and are able to conduct them on a large scale but still respecting short recruitment deadlines. Our team is focusing on the network of clinical investigators and sites in the field of vaccines and also putting a lot of effort and planning to the logistics behind such large trials with recruitment periods of a few months only" says Mr. Spasic.

Information about TFS Trial Form Support (TFS)

TFS is a full-service clinical CRO, providing the pharmaceutical, biotechnological, medical device, diagnostic and functional food industries with a wide range of clinical trial services. TFS services cover the whole clinical development programme from early explorative Phase I trials to registration trials in Phases II-III and post marketing surveillance trials in Phase IV. The 300 highly competent employees dedicated to accuracy and service have made TFS one of the fastest growing CROs in Europe with multiple offices spread throughout Sweden, Denmark, Finland, Norway, the United Kingdom, Spain, Italy, Portugal, Russia, the Baltic States, India and Japan.
