TFS establishes office in Cambridge (MA), United States

TFS Trial Form Support International (TFS) has as of April 2008, established its first office in the United States. The office will be located in the central of Cambridge (Massachusetts) and will be operational by May 2008.

This will be the third oversea office outside Europe and serve the growing amount of US based midsized and small life science entities seeking clinical development support with TFS.

"Having close to 25% of our global net revenue coming out of the US market with a satisfying growth potential considering our back-log this was an easy decision taken by the management and our Board. We simply need to come closer to our US customers and this establishment shows that we are taking them seriously" says Mr. Daniel Spasic, Chief Executive Officer of the TFS Group.

The Cambridge office will also support European and Asian life science companies interested to enter their clinical trials in the US. The US operations will initially offer services focused on regulatory and project management liaison between Europe and US requirements and also dedicated key-accounting.

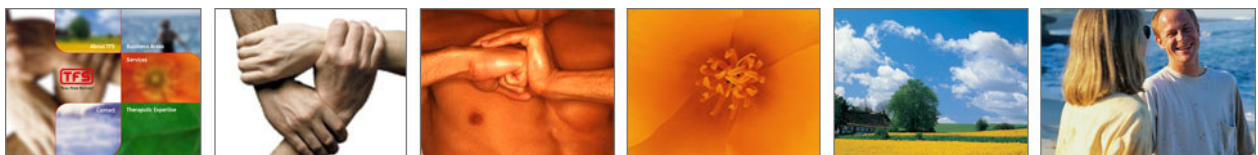

"Opening of the new office in Cambridge is a positive step for TFS. The new office will enable us to better respond to the increasing need of our customers in the US. I am of course excited to be a part of this development." says Ms Jovanka Ostojic (Medical Licentiate Biomedicine), Business Support Manager for USA at TFS Trial Form Support International AB.
