

PRESS RELEASE

Lund, June 17th, 2008

For release 9 a.m. CET, June 17th, 2008

TFS in collaboration with National Institutes of Health (NIH)

TFS Trial Form Support International (TFS) has as of March 2008, been awarded its first assignment by the National Institutes of Health (NIH), a part of the U.S. Department of Health and Human Services.

The clinical trial will be conducted at 3 sites in Sweden and Norway with possible expansion to sites in Denmark or Finland. Recruitment of the first subject is anticipated to be in June 2008. It is a phase II study in the area of transplantation among patients suffering from severe diabetes and diabetic patients that have previously undergone transplantation. The trial will recruit 72 subjects during 36 months and with an additional 12 month follow-up period.

"Of course, we feel very proud at TFS that NIH selected us for this particular trial, as this is often the privilege of the global US based CRO:s. I think that our long experience working with the product in early clinical development and our dominating geographical position were the decisive factors why NIH selected TFS" says Mr. Daniel Spasic, Chief Executive Officer of the TFS Group.

The investigational product is developed by TikoMed a Swedish niche specialty pharma company in close collaboration with the University of Uppsala and will now with the funding of NIH enter into later stage of clinical development.
